CTD135 : Intermediate Vehicle Control

This course will introduce students to the sight side parallel parking maneuver. Using three basic steps, the students will intentionally maneuver the tractor and trailer in reverse from a parked position into the 100 x 12 box on the left side (driver's side or sight side) of the vehicle. The students will further enhance mirror usage skills and develop a professional level of competency in the various set-up positions and maneuvering techniques (pull ups & steering adjustments). Students will also explore "Skills Lessons" with an emphasis on stress and organizational management. In addition, students will continue "Transportation Industry Awareness Lessons" with a focus on the procedures to drive a tractor trailer with hazardous materials over a railroad crossing.

Quarter Credits	**2**
Clock Hours	**40**
Lab Hours	**40**
Prerequisites	**CTD130**
