PHT120 : Drug Classification Systems

In this course students study therapeutic agents, properties, actions, and effects on the human body and their role in the management of disease, specifically in the management of pharmacy medication therapy. Drug dosages, therapeutic properties, side effects, interactions, toxicities, incompatibilities, over-the-counter (OTC) medications and dietary supplements will be discussed with their possible interactions with prescription, restricted and investigational drugs. Upon completion of this course, students will be able to review patient prescription and medication orders/profiles for safety and accuracy while assisting the pharmacist.
