BIO105 : MICROBIOLOGY WITHIN THE ORAL CAVITY

This course is designed to provide an overview of the elements of microbiology that apply to the oral cavity. Students will study the characterization and classification of selected Gram-positive and Gram-negative pathogenic bacteria. The student will also be introduced to hypersensitivities and pathogenic Chlamydia, spirochetes, and vibrios. This course includes a lab component.

Quarter Credits	**4**
Clock Hours	**60**
Lab Hours	**32**
Lecture Hours	**28**
Prerequisites	**BIO100**
